FOREWORD

For the past thirteen years, the educational characteristics in this document have been presented in essentially the same format to allow comparisons over time. Each issue has been modified to include additional characteristics as new data become available. Therefore, comparisons will vary in the number of years for which data are presented. Such comparisons will yield changes in descriptive trends for districts as well as for the State.

The 1983 edition contains 101 ranked characteristics that are arranged alphabetically, by district name, and numerically, by characteristic value. In some instances, a high value may be favorable; in others, it may be unfavorable. Users should give attention to the sources that are supplied in the Footnote Listing at the end of the tables as well as the Explanatory Notes at the beginning of this document. This information is supplied to further clarify the characteristics of interest.

We urge you to use the enclosed information with caution. High, low or median values for the characteristics presented in this publication do not necessarily illustrate quality in education. Many other factors must be considered when searching for quality education. The updated information may be useful to you in preparing local profiles, public information brochures and other such sources of information.

For the past nine years, the Office of Research, Management Information Section, has provided District Profiles based on the school district characteristics found in this document. These profiles will be available again upon request.

We continue to desire your comments as to how you use the information within this publication and its importance to you. Your recommendations for change as well as any questions concerning the content of this publication are invited and encouraged.

EXPLANATORY NOTES

The 1983 edition of RANKINGS presents 101 tables of ranked characteristics related to public education in South Carolina. The numbering of Tables 9-101 in the current edition remains the same as the numbering in the 1982 edition. The characteristics are arranged alphabetically by school district name and numerically by characteristic value. In some instances, a high value may be favorable; in others, it may be unfavorable.

Statistics for Felton Laboratory School and South Carolina Youth Services institutions were excluded from all tables except Tables 56-60 which rank average years of experience of the various staff categories and Table 72 which ranks average teacher salaries. The reporting method used in the source documents for these tables did not allow such exclusions.

The user should review thoroughly the applicable comments below before using the information presented in the tables of this publication.

Population

This current edition contains corrections of population errors found in the Advanced Report on Population and Housing (PHC 80-V-42). Tables 1-4, 7 and 8 incorporate the corrected population figures for 1980. Also, some tables involving 1980 Census data in last year's publication have been replaced by tables containing new information. Table 4 which ranks counties according to percent of population under eighteen years of age may be of particular interest.

Economic

Tables relating to employment in various categories (Tables 13-19) display estimates of nonagricultural wage and salary employment by the county in which the work was performed, rather than by the county in which the workers resided. This reporting was consistent with the reporting in previous editions. The State figures may not equal the sum of county figures in the employment tables due to rounding procedures and inability to allocate some workers in the South Carolina totals to specific counties.

In order to maintain the confidential nature of data reported by employers, information was not shown in the source document for industries with fewer than three reporting units or when any firm or two firms combined accounted for 80 percent or more of employment in the industry.

As in the past six editions, the labor force statistics used to calculate unemployment percentages (Table 20) were reported on a residence basis rather than by place of work and were adjusted to the current Population Survey Benchmark.

Table 21 gives the 1981 average weekly wage of workers covered in employment. The data reported in the source document were based on employment and payroll information reported by employers to the Unemployment Compensation Division of the South Carolina Employment Security Commission on their regular quarterly tax reports.

Pupil

Prior to the 1973-74 school year, the official pupil count was the 10-day cumulative enrollment at the end of the 180-day reporting period. The official pupil count for 1973-74 through 1977-78 was the 35-day cumulative enrollment at the end of the 180-day reporting period. Thereafter, the official pupil count has been the Average Daily Membership (ADM) at the end of the 135-day accounting period. Unless otherwise noted, kindergarten has been included in membership. Tables 33-38 present enrollment figures rather than ADM figures to allow comparisons over time.

Professional Staff

Unless otherwise stated, statistics for personnel in special education schools were included in tables relating to professional staff. Personnel in multidistrict organizations were not included in the various staff tables due to the impracticality of allocating such staff to individual districts.

Financial

The financial tables include expenditures and revenues for area vocational centers and county boards. The area vocational center monies were prorated among the districts on the basis of the number of pupils attending the centers (See Appendix A). The county board monies were prorated on the basis of ADM for the respective districts (See Appendix B). Total expenditure and revenue amounts were rounded to cents.

The pupil counts used in the computation of expenditures and revenues per pupil were the average daily memberships for the 135-day reporting period. Kindergarten pupils not classified as handicapped or homebound were counted as half-day pupils.

Funding for fringe benefits went directly to the school districts for 1981-82 rather than flowing through the State Department as in previous years. Revenues from State sources and expenditures for General Administration include the employers' portion of fringe benefits in this edition.

Total expenditures for general operating purposes reported in this publication (Tables 75, 91 and 92) include the totals for General Administration, Instructional Services, Plant Operations and Maintenance, and Auxiliary Services. The above expenditures are referred to as current operating expenditures. Expenditures for Capital Outlay and Debt Retirement (Tables 97 and 98) are not included in the tables reflecting current operating expenditures. Adult programs, community services and pupil activity are among the categories included in Auxiliary Services. See Appendix C for a complete listing of District Superintendent Annual Report accounts used in the computation of revenues and expenditures.
